Leonardo Neufeld

leonardoneufeld@gmail.com | linkedin.com/in/leonardo-neufeld | Bern, Switzerland · EU citizen, B permit

PROFILE

M.Sc. Data Science student at BFH who ships production Python and LLM automation. Industrial engineer with operations data experience in Germany and the US, plus university data projects in Mexico; brings business context to data and AI work.

CORE COMPETENCIES

Python	SQL / PostgreSQL	Apache Spark	TensorFlow / Keras
LLM Agents & Tool Use	Power BI	Test-Driven Development	Process Automation

WORK EXPERIENCE

Recuro · Bern, Switzerland — 01/2026 – present

Founder & AI Automation Developer

- Build AI workflow automation for small gastronomy businesses; first deployment: **LeBread Ops**, a Telegram staff assistant for a Bern bakery café – **eliminated 4 h/month** of manual overtime checks
- Owned the product end-to-end: requirements with management, 27-section spec, backlog prioritisation, rollout
- Python backend (SQLite, APScheduler, Claude API tool use) with an LLM chat layer; pay and hours logic deterministic in code – the LLM only proposes changes, which are saved only after the responsible person confirms
- Google Calendar/Sheets/Drive sync via OAuth; **1,700+ automated tests (pytest), 99% coverage**

BUNCA. Coffee · Frankfurt, Germany — 11/2024 – 10/2025

Logistics Lead (Head of Logistics)

- Built Power BI KPI dashboards tracking labour productivity, process efficiency, and inventory levels
- Automated inventory management (Excel/VBA) with dynamic reorder-point calculations – **product shortages down 20%**
- Led shipment planning across European distribution flows – **delivery lead times down 50%** (Germany) and 25% (Europe)
- Managed the warehouse team; introduced standardised work and continuous improvement

KPMG Consulting · Stuttgart, Germany — 05/2024 – 10/2024

Logistics and ERP Systems Intern Consultant

- Wrote Power BI queries integrating multiple databases for cross-branch supply chain KPI dashboards
- Supported the evaluation of supply chain risk and ESG tools for an AI-based solution for automotive clients; supported SAP S/4HANA migration

VIGO Coffee · Chicago, USA — 04/2023 – 12/2023

Operations Manager (Acting COO)

- Data-driven loyalty and promotion strategy – **recurring customers up 70%**; designed and implemented a Lean supply chain that cut raw material costs from 35% to 25%

EDUCATION

M.Sc. Data Science (in progress) – Bern University of Applied Sciences (BFH) — 09/2026 – present

Machine learning and neural networks (TensorFlow/Keras, CNNs) · data engineering (Apache Spark, Docker) · databases (PostgreSQL)

B.Sc. Industrial Engineering – Tecnológico de Monterrey (ITESM) — 08/2019 – 06/2023

GPA 3.7 / 4.0 · Data analytics and logistics consulting projects for Uber, José Cuervo, and FLEX

SKILLS

Programming & Data: Python (pandas, TensorFlow/Keras, pytest), SQL, PostgreSQL, SQLite, Apache Spark (DataFrame, Spark SQL), Jupyter, Docker, Git/GitHub

AI & Automation: LLM agents and tool use (Claude API), Telegram Bot API, Google APIs (OAuth), Playwright, AI-assisted development (Claude Code)

Analytics & Business: Power BI, Excel/VBA, SAP S/4HANA, Lean process optimisation, requirements engineering

Certifications: Python for Data Science and Machine Learning Essential Training, Parts 1 & 2 (LinkedIn Learning)

Languages: English (native), Spanish (native), German (C1), Italian (B2)
